Comments	We object to this proposal on the following grounds There are no adequate plans for the existing traffic to enter the site until the new Arundel A27 link is built. This proposal will contribute approx. 100 HGV movements in and out a day probably six days a week. This will be on to of the planned construction of several thousand new dwellings with probably four car journeys per dwelling per day. It is no good saying there are adequate roads along the A259 because everyone knows the road is at full capacity already What about the health risks to local residents from the often toxic material brought into these sites?
