Comn	nent for planning application WSCC/036/20
Application number	WSCC/036/20
Name	Annette Tribe
Address	3 Loveys Road, Yapton
Type of Comment	Objection
Comments	This application is totally unsuitable for this area. This is a residential area with new houses going up all the time. This is an area for families, not for huge buildings emitting possible toxic fumes over families in the area for many years to come. You have many people living nearby, and some people living in very close proximity to what would be a huge waste site which is obviously going to be emitting toxic fumes. I am greatly concerned that this will have negative consequences on the local community. This type of facility should be built away from a residential area on an industrial site and not in an area where there is many houses, some brand new, a school, a local successful pub with a garden and several new housing developments in the pipeline. Also, the road this development will be on is already busy without lorries thundering up and down it all day. The entrance to Fordwater

Gardens, which is near to where these proposed buildings will be, has already had one traffic fatality in recent years. This is not a suitable position and I will seriously think about moving from the area if this
