Comments	<input type="text" value="This will ruin the beauty of the area, and therefore being house prices down. My fiance has just undergone a first in the world dcd heart and lung transplant he doesn't need to now live in an area that creates air pollution. He is on immunosuppressive medication and could catch a ray of bacteria from such a plant. This area needs more living facilities like housing, a school, a pub, a community centre not a waste plant. We already have to injure the smells from the airfield."/>
