Good Afternoon,

I am writing to you with comments regarding Application no. WSCC/036/20

We are FOR the plans in place of the demolition for existing buildings and the operations of an energy recovery facility and waste sorting and transfer facility at Grundon's waste management and Viridor waste management site. All areas need industry and anything that involves recycling and dealing with waste is essential.

However what we cannot understand is how plans for future housing nearby could even be considered, currently in the area of the proposed housing is an industrial area with industry such as waste transfer, metal recycling, A sewage plant. This is only going to cause future problems.

Kind regards

H D White Ltd
