Type of Comment	Objection
Comments	The proposed energy from waste site would not only destroy the historic area, it would also be a severe health risk to anyone living in the surrounding area. Potential toxic and noxious fumes should be miles away from inhabitants, not right on top of them, causing issues, at the very least to those with asthma or other respiratory conditions. The surrounding roads are not suitable to take up to an extra 120 lorries and will be a risk to life as well as damaging the roads and presenting traffic issues. In addition the proposed building of 1500 new houses will be hugely de valued. No one wants to live on an energy from waste site as large and obtrusive as this. The whole area will be spoilt and de valued.
