Comment for planning application WSCC/036/20	
Application number	WSCC/036/20
Name	Karen Garner
Address	LOVEYS ROAD, 34, LOVEYS ROAD, ARUNDEL, BN18 0HG
Type of Comment	Objection
Comments	I wish to object to this application. I feel the building is far to high with a very tall chimney which is not in keeping with the local area. The site is a small piece of industrial land nestled amongst a predominantly housing area. There are all sorts of chemicals to be emitted from the building which conflicts with the use as a dwelling house for all surrounding residential properties and villages who wish to occupy and enjoy their homes and gardens. This is a health risk to residents over a large distance as the smoke and chemicals disperse into the air. Please consider that this application is for a large industrial building within a residential area, not the other way round. People with breathing difficulties will suffer from the emissions. There will also be other health risks associated with such a large building of this use in this area. I hope you have knowledge of the local villages and will therefore conclude overdevelopment of this small site with such a monstosity of an industrial building. It must

not be permitted within such close proximity to so many residential properties. Thank you for reading
