| Comments | I live in Yapton, just down the road to the proposed construction. Recently we have had several hundred houses built in the village and surrounding areas without any extra infrastructure to support the roads or shops with the extra families and road traffic that these have brought. However, there is a collective continued working together to still provide community that is so important to the wellbeing of families and those living within the villages. This is a rural village which will be totally slaughtered with this proposed construction in place. Whilst I understand the need for such businesses to exist, to put this in the middle of a rural village (despite it having an 'industrial estate'), obscuring the landscape and view of the downs is thoughtless by those who agree this. The added traffic that this will bring, will cause more pressure on already overloaded village roads and children and pedestrians are much more likely to be injured due to an already inadequate pedestrian system (ie no pavements or cycle paths to the main routes out of the village. There will be added pollution to the area by the construction, the plant itself and certainly by the I crease of lorries. Let alone the damage to the he surrounding nature that we have and enjoy (which is why we moved here). This should be built in an area that already has a supportive infrastructure and where the chimney would not be so noticeable or an already large industrial area. But certainly not here. |
