Objection

I wish to object strongly to the planned building of the incinerator at Ford. It will be seen from miles away and as this is supposed to be an area of outstanding natural beauty at the foot of a national park it will be a blot on a beautiful landscape. We will get hundreds of lorries on our already congested roads which are unable to cope. The roads are in a bad state of repair and with all the lorries coming from London and Hampshire this will further deteriorate the roads. Local residents will be in more danger if they wish to cycle or walk along the roads. I feel the incinerator should be built just off an 'A' road or motorway so as to cause local residents as minimal disturbance as possible. There are going to be many more cars on the local roads in this area due to all the housing developments that have been agreed to, so to have all the lorries as well it will be a nightmare. Together with the pollution from these lorries and the noise from them and the whole incinerator site. Rudfield Industrial Estate already causes terrible noise pollution. Our property prices will drop and properties become more difficult to sell, who would buy in an area with this monstrosity always visible and with so many lorries each day thundering along the country lanes. The lorries we already have drive at dangerous speeds even though they are meant to observe the speed limit. There are insufficient police about to enforce this. I find it disgraceful that this project has even been considered for this quiet and beautiful area. Do WSCC or ADC really care about their area!! It's not as if the price of land here is cheap. This must not be allowed to get the go ahead.
