Comment for planning application WSCC/036/20

Application number Name	WSCC/036/20
Address	LYMINSTER NURSERY, LYMINSTER ROAD, LYMINSTER ROAD, LITTLEHAMPTON, BN17 7QF
Type of Comment	Objection
Comments	I object to this application as not sufficient safeguards or restrictions have been put in place to protect the local population from emissions, noise and light pollution and from the increase in road traffic which will certainly result. It is well reported that such waste incinerators generate high levels of CO2, nitrous oxide and other oxides of nitrogen and ammonia and high levels of particulates. This could have negative health effects on the local population The additional road transport required to service this plant will be huge resulting increased nuisance form noise and contamination of the surrounding villages . The siting of this site close to the sea means all the waste transported in will have to come in by road from only 3 directions. Siting such a plant closer to the source of the waste would make more sense. If the other objections are overcome then believe it should be a requirement of any planning consideration that they are made to make use of any CO2 and other waste gases produced so that it is used rather than pumped up into the atmosphere and the plant then becomes CO2 and nitrogen emissions neutral.
