A) If the scales I am seeing are correct, it would destroy the views walking along the River Arun. Additionally, what with a good standard children's football facility nearby, I worry about heavier than air particles coming back down close to them breathing heavily. Additionally, I refuse to believe there is no better location further inland / west than this close to an area that we have continually been advised will be rejuvenated (Littlehampton) as this would put investors off having it so close.
