Type of Comment	Objection
Comments	I understand the need for the chimney height, and the building height. However, i massivly feel that in this area it is not only unsuitable but will be a total eye sore. We have a number of high buildings in the surrounding areas, none of which are as high as this is going to be. Not to mention, the noise, dust, enviromental contamination and increase in HGV traffic it will bring to the village. How can that be a viable thing to allow.
