Objection

Please join me in stopping this grotesque waste incinerator. If enough people protest against this crazy proposal it may just force the developers and authority (who are giving the planning permission) the incentive to look at other and more sustainable methods of generating energy from waste rather than creating this massive incinerator. This industrial monolith will pollute the local air quality which in turn will destroy the local fauna, wildlife, and environment, the locally grown crops, which we are so desperately trying to hang on to, the local roads, and peace and quiet for the locals. It will bring in massive trucks from all around South England and turn a quiet and beautiful area into a massive industrial estate. Where is 'moving forward' into more sustainable and recycled methods of generating energy from waste? Please sign the petition ASAP, as usual this news was not made public, but has been discovered and there is not long to help stop it. Thank you for helping save our precious countryside and all that exists within it and because of it. This is a disturbing and disappointing development that falls short in so many ways, it is neither sustainable or environmentally attractive. It would also appear that the manner in which this project is being pushed through is suspect and underhand. This is not progress, it is abhorrent and should be stalled with immediate effect.
