Comments	In an area which has been predominately rural, this development is very definitely a step too far and is a considerable threat to our natural environment. We live on Ford Road Ford right by the railway station. At one time all heavy lorries were not not to use this road but to approach the airfield from the Yapton side having come in off of the A259. In the last couple of years this has changed and a very high percentage of the traffic is now HGV. With this proposal for incineration you state the waste will be brought to the site by 120 lorries daily. Causing more congestion, pollution and highway safety. The effect on the landscape will be catastrophic and that along with the planned housing development for the area, should be reconsidered or ideally abandoned
