Objection

We wish to object strongly to the planning application: WSCC/036/20 siting all the reasons already expressed by Walberton and Ford Parish Councils objections. We also wish to bring to the WSCC's attention how distressing it is hearing the HGV's passing everyday outside our house. These vehicles produce intolerable noise levels, very often speeding, producing even more noise on their return journeys, having tipped their loads. The air quality is already impacting on health, the emissions from even more vehicles will add to this. We also often have rubbish strung across the road from speeding, departing HGV vehicles which then gets swept up in the drag from other vehicles and often comes to rest on our house frontage. We feel deeply distressed at the thought of this planning application coming to fruition. The further loss of quality of life for local residents and the environmental impact will be devastating. No doubt it would have a negative impact on the value of our houses too. Who would want to move into such an area with this proposed monstrosity of a building in full view. Councils and Government should be looking at reducing this type of facility and looking at cleaner, safer ways for the environment we all live in.
