Comments	The opening of this facility will offer both existing and new employees (approximately 80 staff) professional development opportunities in working with and understanding the waste process and the benefits it will bring to the local community. The facility will reduce the road miles the waste has to travel, in turn this will reduce the impact on the environment by requiring less diesel fuel to transport the waste. Provide local businesses with a long term continuity of service. The facility will provide much needed waste management capacity for West Sussex and surrounding areas.
