comment for planning application wscc/036/20	
Application number	WSCC/036/20
Name	Maria McKenna
Address	GRACE COTTAGE, COPSE LANE, COPSE LANE, ARUNDEL, BN18 0QH
Type of Comment	Objection
Comments	I very strongly object to the Ford Energy Recovery Facility because it is totally unsuitable for the proposed site: - It is MUCH too near local housing - Ford airfield has a proposed planning development which would be adjacent to the site and therefore totally inappropriate. Why would anyone purchase a house that close? - The chimney stack would be visible from the entire neighbourhood, including the national park, which I believe should have a protected view (Protection of Landscape Character) - there is a high risk of pollution to the whole area, which would be unacceptable - It would have a detrimental effect on the local environment - There would no doubt be increased HGV movements on our small local roads around Walberton. These roads are NOT suitable for such vehicles. Not only would the HGVs be too big, but they would create yet more pollution and noise very close to residential areas. So I strongly urge you to turn down the proposed application. Thank you.
