Comments	1. This huge size of facility is not in keeping with the local area which is semi rural countryside. 2. Despite restrictions of vehicle movements, this facility can deal will waste far in excess of that bought in by the vehicle movements stated and therefore the restrictions will no doubt be increase over time. 3. The 1st consultation period for this planning application happened during Covid-19 lockdown. How can something of this size and impact be given so little consultation. It feels as if this was a deliberate ploy to get this application through.
