

Comment for planning application WSCC/036/20

Application number	<input type="text" value="WSCC/036/20"/>
Name	<input type="text" value="Kia Trainor"/>
Address	<input type="text" value="Brownings Farm Blackboys Uckfield East Sussex"/>
Type of Comment	<input type="text" value="Objection"/>
Comments	<p>The application site is adjacent to a site allocated for mixed use including 1,500 homes in the adopted Arun Local Plan and Ford Neighbourhood Plan. CPRE Sussex assisted Ford Parish Council in considering this allocation with a 'Making Places' two - day community workshop in June 2018 to help inform the design principles. We are fully supportive of the Parish council's wish to create a 'heart' to their village and provide local affordable housing via their CLT. We hope that Ford village can become an outstanding example of how communities can work together to influence the creation of new places that enhance their surroundings and provide high quality living for future generations. This new community is now at risk from the effects of a proposed energy recovery facility which is substantially larger in scale than the one previously permitted on this site. The impacts are set out in detail in the representations by Ford Parish Council, which CPRE Sussex fully supports. In summary the proposed facility should be refused planning permission for the following reasons: Its excessive size and design would be highly damaging to the immediate landscape and views from the South Downs National Park contrary to landscape and design policies in the Ford Neighbourhood Plan and Arun Local Plan and NPPF 170 and 172; It is contrary to national policy and guidance that the planning system should support the transition to a low carbon future in a changing climate. National Planning Practice Guidance describes the need to address climate change as "one of the core land use planning principles" that should "underpin both plan-making and decision-taking"; It is contrary to the direction of travel set out in the Environment Bill which seeks to move our economy away from the 'take, make, use, throw' system to a more circular economic model that keeps resources in use for longer and ensures that we extract the maximum value we can from them; It could prejudice the delivery of the market housing on the adjacent allocated site because of the developer's concerns about the impact of the proposal on the sales value of dwellings; and It could prejudice the delivery of affordable housing on the adjacent site by the Community Land Trust. Yours sincerely, Kia Trainor Director, CPRE Sussex</p>
