Comments	Approval of this application would be a massive boost to the local economy and job market. There is currently a lack of waste disposal options within the area meaning companies are paying above average costs compared other parts of the UK and the fact that this sustainable disposal method will produce energy for thousands of local properties is a further positive. Grundon have invested heavily in the area already and have made great improvements to the site and contributed to local organisations. Cancer United have been greatly boosted through their sponsorship and it is massively appreciated. This clearly shows Grundon's long term intentions to the area.
