Comment for planning application WSCC/036/20	
Application number	WSCC/036/20
Name	Andrew Compton
Address	Hewitts Close, Leafield, Witney, Oxon,
Type of Comment	Support
Comments	Having read through the associated documents and currently involved in Landfill Management I cannot see, in the current environment, any negative reasons to oppose this application. Proposals such as this will affect me personally and limit my advancement in my current role, however, the positives to accepting this would offer me the opportunity to train in a role that would benefit both myself, family and residents across the united kingdom to live in a cleaner and less polluted environment. By creating opportunities for residents of West Sussex to also contribute to a sustainable industry that contributes massively to the Circular Economy and moving waste from a dirty label to one that is clean and beneficial. I noted that residents were concerned about the visual impact on the South Downs but by reducing the contribution of polluting gasses to the atmosphere the Park can be enjoyed by more generations.
