Objection

I have rented a studio from the Mill Studio for five years. I know the site well and was informed that the application had been put on hold, I have had no notice of any change. I heard today from Slindon Life newsletter that it was going ahead. I object to this proposal because I was not given drew notice of the application plans. I object to these plans, due to the impact on the immediate environment around the proposed energy facility. The new proposed height of the building will over look the Mill Studio and will impact on our outlook. Additionally the noise and disruption to the immediate area will impact on my business, and may deter students from studying. The objective to have an energy recovery facility and a waste sorting and transfer facility for treatment of municipal, commercial and industrial wastes will impact on the air quality, environment, landscaping. During the building of this facility the noise and disruption will inevitably cause problems in the immediate area, not with standing, the increased traffic from commercial vehicles, and private and other contractors in this already highly populated area. With the additional residential building proposed on Ford Lane, this will be a disaster in waiting, with traffic building up on Ford road to Arundel or to Littlehampton. This planning proposal is in a residential area and the plans are for a commercial business with high impact on the lives of those living so close to the proposed work. My business will be affected loosing me income in a turbulent time, this planning development is not welcome and will not enhance the area or help in any way with the local community. It will be an eye sore that causes pain and discomfort from the planning proposals to the building to the activities it has in store which could cause long term damage to people.
