Comn	nent for planning application WSCC/036/20
Application number	WSCC/036/20
Name	John Lockwood
Address	DAYLESFORD, PARK ROAD, PARK ROAD, BOGNOR REGIS, PO22 0AQ
Type of Comment	Objection
Comments	I agree with Parish Council spokesperson that the size, height and scale of the building will influence and make an unacceptable impact on the landscape and character in the surrounding areas. The effect to the historic features of Arundel and the views from the South Downs National Park will be blighted and damaged forever. You will not be able to reverse this impact for generations. Heaven knows what pollutants (and un-quantified health risks) will be produced that needs such a high chimneyand this is probably just a cost cutting exercisethe company avoiding investing in scrubbing/cleaning technologies. What is the fire risk (i remember that you couldn't deal with westhampnett tip fire which would be small scale compared to if this went up) could the water table become polluted. How noisy will the plant be, how noisy will the traffic be. For both we need to see the dBs, frequency and time of day predictions. I bet the cyclists and remaining hedgehogs cant wait for more HGVs. How plain daft can you get building a massive incinerator next to a new housing estate (that the residents also don't want). If you want green energy how about more solar power, wind and wave. What is the impact on local wildlife (short medium and long term predictions are required).
