Comment for planning application WSCC/036/20

Application number	WSCC/036/20
Name	Penny Broughton
Address	26 Braemore Close
Type of Comment	Support
Comments	I am in full support of this application for the following reasons: - 1. Energy recovery from waste is a great effective way of reducing fossil fuel consumption and diverts non-recycled materials from landfills. 2. This will reduce the distance travelled to waste disposal points in the County thus therefore reducing emissions. It will also adress the issue of the shortfall of waste disposal points in the county. 3. The Grundon - Viridor partnership has a great track record of operating this type of facility in a very responsible and efficent manner. 4. The plant will provide 80 additional much needed additional jobs in the area.
