WSCC/036/20

Support for Energy from Waste Facility at Ford.

I wish to support the planning application for an Energy from Waste Facility at Ford.

There are a lot of new houses being built locally, now and into the future – households which will create more and more waste as time goes by.

This waste has to go somewhere.

Currently waste is being transported by road to other Energy from Waste sites across the country and also to landfill sites. This uses fuel and creates emissions.

Too much waste goes to landfill sites country wide – ruining the countryside - and ending up in the sea around our coasts, killing marine life and washing up on our beaches.

I believe creating Energy from Waste is a more environmentally friendly way to get rid of waste in the South Coast area.

The useable Energy created would be an added bonus and help towards using less fossil fuels.

Kind regards

Ms L Pelham
