Dear Sir/Madam

Planning Application Ref No WSCC/036/20 (Ford Energy Recovery Facility and Waste Sorting and Transfer Facility)

I work in the Estates Team for Grundon Waste Management Limited and write to support the above planning application submitted to West Sussex County Council by Grundon and Viridor for a new state-of-the-art Energy from Waste (EfW) facility and co-located Waste Sorting and Transfer Facility (WSTF) in West Sussex

I fully support the above application for the following reasons;

- A new Energy from Waste (EfW) facility and Waste Sorting and Transfer Facility will create approximate 80 new jobs which will support the local economy
 - These new jobs will also create new opportunities for professional development opportunities as well as improved job security
 - The treating of waste in a new state of the art EfW facility and Waste Sorting and Transfer Facility will have significant benefits for the environment and economy as it will ensure that non-recyclable waste is diverted away from landfill
 - The new site will also generate renewable energy and provide Grundon's current and future customers with a continuity of service
- I would be grateful if you could take my comments above when determining this application

Kind regards

Jolyon Fallon
