Subject: Support for application ref. WSCC/036/20
Date: 04 August 2020 12:07:36

Good afternoon,

Can I please raise support for the above planning application for a new state of the art energy from waste plant at Ford Technology Park. This facility introduces a new sustainable method of managing waste from across Sussex and beyond, by diverting material from landfill and generating very clean energy. The plant will reduce the material currently being sent into Europe and beyond to be recovered, reducing CO2 emissions from lengthy transport. The plant will also create long term jobs for many in a very secure industry, as well as short term contracts for construction firms.

The environmental value to the county cannot be underestimated and Grundon and Viridor's experience in running these plants successfully makes this a great solution to waste management in the area.

Thank you

Brendan Morris
