Objection

I wish to object to the proposed plan for the following reason: The submission includes a chapter on Health which gives in great detail the effects of the proposed site on the surrounding area. It discusses the effect on a notional adult and a notional child. The area around Ford, in particular to the east, has a demographic profile which is far from the notional adult and child. There are a predominance of old people homes and institutions for children with many problems. Table 8.2 indicates that the plant will raise the intake of dioxins and dioxin-like pcb's for children to almost 94% of the tolerable daily intake. It does not investigate the rise for elderly or sick people. As a person who lives in the lea of the proposed site, I would wish to know the following: a. Which independent authority will monitor the discharge into the atmosphere. b. How often will that monitoring take place. c. What power will they have to stop the plant if predicted levels are exceeded. d. Will the authority also monitor the effect on the health of residents in the area, both next to the site and beyond, to show that they do not deteriorate as predicted by the report.
