Comment for planning application wSCC/036/20	
Application number	WSCC/036/20
Name	Christopher Boyce
Address	BOND STREET, 1, BOND STREET, ARUNDEL, BN18 9BL
Type of Comment	Objection
Comments	The size and scale of the building will influence and make an unacceptable impact on the landscape and character in the surrounding areas. I believe the effect to the historic features of Arundel and the views from the South Downs National Park will be blighted and damaged forever. I also believe the site is unnecessary and the government's drive to reduce and bring all greenhouse gas emissions to net zero by 2050 would be much diminished. Furthermore The surrounding road structure is not sustainable to accommodate heavier, larger lorries which will be used when the plant is built. The environment and health of the surrounding community is at risk too. This isn't an application to meet the needs of the people it is purely one for the proposers to make financial gain. The Human Rights Act is being broken on so many levels and this proposal should not be allowed to happen. Whilst these objections have been stated before, they are worthy of repitition
