Objection

I would like to object to the building of the proposed energy recovery facility in Ford for the following reasons. The suitability of the area the Dust/odour/fumes/rats/seagulls/and the infestation of flys all related to rotting waste. This would obviously produce methane gas if the site was not cleared daily and kept to an exceptionally high standard and as the government are so concerned and committed to reducing the dangerous emissions to the atmosphere I assume this has been taken into account. I have grave concerns with regards to the traffic this facility will generate on a road and highway system already not fit for purpose and the noise/disturbance it will inflict on the nearby residents. I'm also at a loss as to know why such a development is needed as West Sussex signed a contract not many years ago to take the waste from this area to Warnham which I believe was a 25 year contract. So, I assume I am right in the assumption that the proposed development is just a money making machine for Grundon and Viridor at the expense of the local area and residents. lastly I cannot believe the height of the proposed building especially as the Rolls Royce building/factory was built mostly underground, I ask myself 'would this development be passed if it was on the Goodwood estate land' I very much doubt it would.
