| Comments | <input type="text" value="This is unbelievable - we are not in an industrial area although there are some industrial activities. This proposal will totally change our area. More lorries, more houses, more noise, more traffic. Why on earth is this a valid proposal. This operation should be in a remote area surrounded by trees. This proposal should never be accepted in our area. Also property value will go down in our area. Are some people just thinking of making money and not considering our community and environment?"/> |
