comment for planning application wscc/036/20	
Application number	WSCC/036/20
Name	Owen George
Address	62 High Street, Chinnor, Oxfordshire, OX39 4DH
Type of Comment	Support
Comments	I strongly support this application based on the following points: * West Sussex currently has no disposal routes for its residual waste and has to rely exporting its waste to countries outside the UK. This not only has a carbon footprint impact but prevents West Sussex / UK businesses from accessing low cost heat and power. * The supporting transfer station and recycling buildings will increase much needed capacity for recycling within the region. Existing recycling facilities are focused on household recycling. Having facilities specifically for recycling commercial / industrial waste will not only reduce waste going for energy recovery but reduce costs for businesses currently having to send material out of the region. * The proposed EfW is a robust and proven technology which can be relied upon. to provide non-fossil fuel energy Regards Owen
