Comn	ient for planning application wSCC/036/20
Application number	WSCC/036/20
Name	Toni Robinson
Address	The Old Cottage South Street, Letcombe Regis,
Type of Comment	Support
Comments	I fully support this development, as it will ensure adequate waste facilities in the south of England to treat the wastes that is being produced by both individuals and by industry. It will have significant environmental and economic benefits by ensuring diversion of non-recyclable waste from landfill, and, moving waste further up the waste hierarchy. There is then the added benefit that renewable energy will be generated, which prevents the use of natural resources being used for this purpose. In the current climate developments such as this are important in bringing employment to the area, with 80 full time jobs being created. The development will offer new opportunities for progression and career development, whilst offering improved job security. This significant investment in this state-of-the-art waste management facility will provide the much needed waste management capacity for West Sussex and surrounding areas allowing them to manage their own waste for future years.
