Comment for planning application WSCC/036/20	
Application number	WSCC/036/20
Name	Sue Still
Address	1 BOUNDARY COTTAGES, FORD LANE, FORD LANE, ARUNDEL, BN18 0DF
Type of Comment	Objection
Comments	I most strenuously object to this application. Not only will this be a blot on the landscape, reaching over 52m and will be the tallest structure in the vicinity. I also object to the volume of traffic this will introduce to already overused Infrastructure. The roads cannot currently withstand the volume of traffic, let alone with an additional 120 trucks a day. The Ford level crossing frequently causes traffic to be backed up for 15 minutes or more at present. With slower moving trucks, this could increase it to longer waiting times. The emissions from this facility plus the additional traffic will be a health hazard. This will also cause harm to the flora and fauna in the area, potentially being run over or suffering from the effects of the emissions. Why can't this facility be located in a more rural area where there are no houses? There is already planning for a huge new housing development estate on Ford Lane which would make this adjacent to this facility. There must be far more suitable locations for this facility than in Ford where there are traffic issues and houses in close proximity. I shall be taking this to my local
