Comments	I object most vehemently to the building of this incinerator. Promises of odour-free emissions and safe operation are not good enough reasons for placing this monolith in a place where it will impact thousands of people's lives, and will adversely impact property in this part of West Sussex. I have lived close to such an incinerator, and can testify that we were assailed by odours every day, and many the health of many people was adversely affected by odours. This incinerator must be placed in a heavy industrial zone, not close the beautiful Arundel and the surrounding villages. Shame on the West Sussex County Council for even considering this.
