## Comment for planning application WSCC/036/20

Application WSCC/036/20 number	
Name Michael Stair	
Address DRAKE GROVE	E, 1, DRAKE GROVE, ARUNDEL, BN18 0HX
Type of Objection Comment	
comparison to surrounding an time, this area will seriously of residential hou already expan area will remo of this area wi seriously unde population and Environmental such as the so in traffic and h tower visible fi counter produ greener and sa	s application for a number of reasons, Suitability for the area, this proposal is massive in the surrounding area, there are no other structures in any way similar in size. The rea is predominantly residential housing and there are more and more being built all the a was supposed to be set aside for housing but building this massive polluting structure diminish the housing in the area along with the new proposed housing. An area of mainly using should not be an area where this type of facility is located, the village of Yapton is ding hugely to accommodate demands for new housing to add this waste facility to the ve any last vestiges of it being a rural village. The effects on the health of the population II be massive, the south coast and it's wonderful beaches and tourist area will be ermined by such a facility and the fumes and odours will impact very badly on the local d on the visitor numbers effecting the local community in health and wealth. Ily having a massive waste incinerator so close to areas of outstanding national beauty buth coast beaches and the South Downs is unforgivable, there will be a massive increase harmful fumes and a huge impact on the air quality. Locating an incinerator with an 85m or miles around, spoiling the view from the Downs out to sea and from the beaches is so ctive, in an age when we are trying to preserve our beautiful sights and to turn to afer ways to dispose of waste we should not be building an incinerator of this size at all ch a rural and beautiful area.
