Comment for planning application WSCC/036/20	
Application number	WSCC/036/20
Name	Robert Biancardi
Address	FORD ROAD, 12, FORD ROAD, ARUNDEL, BN18 9EA
Type of Comment	Objection
Comments	We have been residents of Ford Road for ten years. Although it is clearly signposted as not suitable for heavy goods vehicles it is constantly used by these to the detriment of our health and living conditions. With the proposed development of a large number of residential properties at both ends of the road which will result in a large increase in traffic this application is totally inappropriate. We have constantly raised the issue of heavy goods vehicles in connection with the proposed Arundel bypass project. Most drivers ignore the 30 mph speed limit and race through and there is often a bottleneck in front of our property. Many families have young children and in short Ford Road even as it stands is an accident waiting to happen. Added to this the air quality especially during rush hours should be tested for particulates and psysmological readings taken to assess possible structural damage sustained to our property and others. I oppose this application in the strongest possible terms on ecological, ethical, structural and esthetic considerations.
