Comment for planning application WSCC/036/20

Application number	WSCC/036/20
Name	Megan Argent
Address	PARK DRIVE, 39, PARK DRIVE, ARUNDEL, BN18 0JF
Type of Comment	Objection
Comments	Whilst I am keen for local jobs to become available for local people, but unfortunately I object to current application. The infrastructure of the local area is already being bombared by the increase in house building in and around the area, without any consideration to an increase of traffic. This site would increase the amount of traffic that is already struggling on the narrow winding roads that were built for our villages, not towns or industrial sites. This increase will be seen even before the site is in operation due to the work needed prior. The roads are at breaking point and need to be assessed prior to any application of such large works should be accepted. A further point will be that whilst it may be financially beneficial for the local government, to be seen and trying to look as if they are more eco friendly than they actually are, it will have a negative effect on local resident's property values. Not only will large plant have a large effect on the immediate residents, it will also have a detrimental effect on those who further away. A chimney higher than Chichester Cathedral will not only be an eyesore, it is likely to lower the historical character of the surrounding villages. We live in rural villages and not an industrial site, and this is what it is going to feel like when we see the large chimney. Whilst I do not have supporting evidence at this time, I am willing to assist with any concerns you may have about the traffic too and from the site. I thank you for taking the time to read this and I hope that you feel able to contact me to discuss further if needed.
