## Comment for planning application WSCC/036/20

Application number	WSCC/036/20
Name	lee DACEY
Address	RIVER ROAD, 24, RIVER ROAD, ARUNDEL, BN18 9EY
Type of Comment	Objection
Comments	I object to this on two basis: 1.The local road infrastructure is inadequate to deal with the logistics required for this industrial development. 2. This is not a solution to the energy transition issues which the UK faces. Combusting waste is not a circular solution it is a solution which ultimately generates greenhouse gases and other forms of pollution including particulates and other complex chemicals. We truly need to look at circular solutions where we take waste and recycle it to eliminate the need for new barrels of fuel entering the carbon energy chain .i.e. a true circular economy solution. This white elephant will be technologically and morally redundant as soon as its commissioned; as new true circular solutions (hydrogen creation, recycling plastics to feed refineries and petrochemical facilities) are commercialised. I don't support investing in redundant solutions.
