Comment for planning application WSCC/036/20

Application number	WSCC/036/20
Name	Sharon
Address	1 Progress Grove, Walberton, Arundel BN18 0GD
Type of Comment	Objection
Comments	Objection to this planning of the Ford waste site. I fully support Walberton and Fords parish councils submitted comments together with the South Downs national park's objections to this site being built. The area of exceptional beauty will be destroyed, the fires from the south downs national park will be lost. Hundreds of HGV's will trundle downs our residential roads to and from the site, including A259 - Yapton Lane, Ford Lane, Horsemere Green Lane, Yapton road. All of these roads are residential and will have a very big negative impact on our quality of living with increasing HGV noise, fumes and vibrations through our homes and gardens. The size of the building is also a monstrosity, especially as it is in the area of proposed new homes and a new primary school to be built. The air quality will suffer and cyclists on these roads will be put at increased risk of the rise of HGV vehicles passing through. It is not in line with environmental standards and people's quality of lives will be affected within immediate and surrounding areas to this site. People have a right to mental wellbeing and a quality of enjoyment to live in their own properties undisturbed. The volume of HGV traffic is a complete violation of a person's wellbeing with noise, pollution and scenic destruction.
