Comments	Having lived here for over 35 years I would expect changes but this is wrong, TJ Waste has now been given permission to break up concrete with a south western wind I will expect a lot off dust. With the permission of the new furnace to be built north of me this is Wrong, plus can you tell me where the 120 plus lorries every day is travelling to, my local road Rollastone road there have been a few incidents & a fatality which could or will rise. Anticipation of your favourable reponse
