Comments	We moved from Berkshire to Littlehampton for the good fresh sea air and so that I could breathe! I have heart disease, asthma and hay fever which I feel is under control currently. I am frightened by this monstrosity being built so near to where I live. It is both a health hazard and an eye sore. Traffic will obviously be increased in the area due to the nature of the business which will ultimately lead to additional noise pollution and increased pollution and toxins within the local area.
