Ref Planning Application WSCC/036/20 LETTER OF SUPPORT

Dear Sir/Madam,

As a West Sussex resident I write to support the above planning application by Grundon Waste Management Ltd.

I am very much in support of this technically safe method of waste management which will create energy for the local community and reduce the need of landfill sites.

I understand that this technology is already being showcased at the Lakeside site near Heathrow and is surely the carbon neutral path for the future.

This site will also create new jobs at a time when every such job is desperately needed.

Grundon as a company is already a huge supporter of the local community. Their support for Cancer United, the West Sussex cancer support charity, has been invaluable and helped them to create the services and facilities which give so much help to local cancer patients.

I would therefore urge the West Sussex Council to grant permission for the new facility at Ford.

Yours faithfully
Sally P Harper
