County Hall  
Chichester PO19 1RH

Dear Sir/Madam

REFERENCE: Letter of Support. Ford Circular  
Technology Park Planning Application WSCC/036/20

I support the application for a waste to energy transfer plant at Ford + recognise the incredibly valuable role that waste management services provide to the community, and that incineration can be a carbon neutral option with the new Technology Graddon are proposing. An ethical + responsible business

Graddon Waste Management Co gets my support for the help it gives to the local community

They have supported Cancer United, a small local charity, of which I am an active member. They have provided storage areas for items donated which we sell at charity market stalls, street fairs etc. raising funds and letting people know how Cancer United operates, and helps so many of us

Graddon has sponsored our choirs, sports teams etc by providing uniforms for choir members + sports kits, and helped us in emergency transport problems. Mr Norman Graddon is certainly our benefactor.

We urge West Sussex Council to grant the permission for Graddon's new Energy Recovery Facility and Waste Sorting and Transfer Facility at Ford so that the community will benefit from improved environmental management of refuse, and increased capacity of waste management.

Also that our relationship with Graddon may continue and that they can support other local charities they consider worthy

Yours truly
