To whom it may concern,

I am writing to express my concern about the plans to build the enormous incinerator at Ford. The impact on the environment will be massive. Any increase in the amount of traffic using the A259 and Ford Road will be really detrimental to the area. More HGVs will increase the danger to cyclists and pedestrians and the roads will be even more overburdened with the quantity of traffic. The building itself will be an enormous eyesore in what is a flat coastal flood plain. I am also sure that the emissions from the chimneys are likely to be harmful to trees and wildlife close by as well as unpleasant for the residents of Ford and Clymping.

I completely object to the development of this structure and to the way that the application was submitted without the knowledge of people who live in some of the towns and villages nearby who will also be affected by its building.

Yours faithfully,
Sue Webb
