Importance: High

Dear Ray,

I can only comment from a waste, rather than planning perspective, however the proposed development has no direct impact on our role as a Waste Collection Authority. It appears that the principle rationale for the expansion is to meet the growing local commercial demand for waste disposal. Whilst this expansion may provide WSCC (as the Waste Disposal Authority) with additional localised disposal options moving forward, as stated above, at this stage there is no operational impact to ADC.

That being said, it would appear from the documentation that there is a carbon footprint reduction benefit in the localised treatment of waste material, which would ordinarily have to be further transported to alternative treatment sites across the country. This can only be viewed as a positive.

Kind regards

Oliver
