Comm	nent for planning application WSCC/045/20
Application number	WSCC/045/20
Name	Terry Layphries
Address	437, HASLEMERE, GU27 3NQ
Type of Comment	Objection
Comments	Given the current climate emergency any further work on the extraction of oil or gas by means of stimulation is unwarranted. The need for clean energy overwhelms the desire for dirty fossil fuels and should be a priority in West Sussex. The transportation of water and chemicals, many of which are undisclosed, for the stimulation of shale rock and subsequent removal and disposal of waste contaminated water leads to major increase in vehicle movements in the area. Then the storage and distribution of products gives increased risk of pollution, spills and leakage notwithstanding. There is no place in our beautiful countryside for this
