Comn	nent for planning application WSCC/045/20
Application number	WSCC/045/20
Name	Kate Meakin
Address	26 De Cham Road, St Leonards
Type of Comment	Objection
Comments	We object to the application because of the awful environmental impact it would have to the local area but also the UK Government's ambition to become zero carbon by 2050. It no longer makes sense to pursue fracking at a time when we need to move to renewable energy sources. The proposal would damage an area of natural beauty . In addition, we have concerns about the complicated hydrology around the drill site, and the consequent dangers to the local water supply; the length of the operation; Angus's use of two different flares (one of which seems to inefficient, and potentially risky for air emissions); the use of acidisation with 15% hydrochloric acid (previous applications were for 10% HCl); the illusory benefits to the local community; the disregard of the movement to combat the effects of climate change; the negative industrialising effects of this development on a beautiful landscape. Signed on behalf of Energise South, Community Energy Co-op www.energisesouth.coop
