Objection

I object to this latest application to remove drilling fluids and carry out an extended well test. I am deeply concerned about the impact of heavy vehicles going past my children's school on London Road in Balcombe - particularly now (as a result of COVID) that they have to use separate entrances and some children have to queue on the main road just centimetres from passing traffic. As well as the physical danger to children crossing the road and standing nearby passing vehicles, you must consider both the air pollution and noise pollution that would result from the increased weight of traffic. The air pollution would of course have an effect on the quality of life and the respiratory health of the whole village. Am am also very concerned about the potential for leakage/pollution of nearby streams, rivers and resevoirs. This is also an area of outstanding national beauty and so there is surely an even greater requirement than in other areas to consider the impact on this natural environment, otherwise why name it as an AONB in the first place?
