Comments	I object to the proposed application for several reasons listed as follows: Not suitable in an AONB. We must protect the AONBs in the UK. Not pollute them. 2. RIsk of groundwater contamination is unacceptable. Water is a valuable commodity that we must protect. Without clean water we will all die. We must concentrate on renewable sources of energy in the UK because we must urgently be actively reducing carbon levels not releasing carbons into the atmosphere. Drilling and digging in any exploration works would contradict the renewable philosophy that we must apply to our future energy use if we are to survive as a race and if our planet is to recover from the relentless destruction that we perpetuate for reasons
