Comment for planning application WSCC/045/20

Application number Name	WSCC/045/20 Charles William Drake
Address	PARKHURST FARM, PETWORTH, GU28 9BB
Type of Comment	Objection
Comments	With oil market analysts now predicting that peak oil production has probably been passed, it is wrong to be exploring for further oil when developed fields contain more oil and gas than can be burned without plunging the earth into catastrophic heating that will lead to the deaths of billions of humans. The British parliament has declared a climate and ecological emergency. This application is inappropriate for an area of outstanding beauty and not in the public interest. There is likely to be air pollution from flaring at the site and a risk of contamination of the water table which feeds Ardingly reservoir. The local roads are not suitable for heavy goods vehicles carrying dangerous loads. Operations at this site have been rejected before and there is all the more reason, with the urgent need to move away from fossil fuels to cheaper renewables, to reject them now.
